

## Following Up

# Oily Problems!

### What Did You Learn?

1. How was the zipping action of the feather affected by the different water conditions?
2. What are some of the actions we can take to keep our waterways clean?
3. How can you find out about recycling used motor oil in your community?

### Wanted: Your Feedback

1. How successful do you think this activity is? Would you change the activity in any way?
2. Describe what you learned from doing this activity.
3. Did you use posters and props at your station booth?  
Were these effective tools for learning about oil and our waterways? Why?

### Question for Reflection

**R**ecent technological advances in transportation of oil, such as double-hulled tankers, have made the transport of oil much safer. Are you aware of any other improvements in technology related to the oil industry?
