SECTION 2 - REQUIREMENTS

Do not provide responses to items in this section unless specifically and expressly required.

2.1 INTRODUCTION
Information regarding Alligator Snapping Turtles in Arkansas is outdated and does not adequately inform our assessment of the species. The most recent (and only) survey in Arkansas was conducted 30 years ago, with little to no distribution, abundance, or demographic information collected since 1996. Alligator snapping turtle populations in Arkansas have been considered mostly unknown in the recent Species Status Assessment by the US Fish and Wildlife Service, with any recent observations solely reported by fisheries as incidental capture in gill nets, hoop nets, and on fishing lines. Currently, the entire state of Arkansas is presumed occupied by the species, although there have been very few records from the Ozark and Ouachita ecoregions. Additionally, the only demographic information from the state comes from a single mark-recapture population established in 1995. To provide updated information for Arkansas, this project will 1) conduct systematic trapping surveys in the six Level III ecoregions (Ozark Highlands, Boston Mountains, Arkansas Valley, Ouachita Mountains, South Central Plains, and Mississippi Alluvial Valley) and 2) establish up to five (total, minimum of three) mark-recapture populations for long-term monitoring within the Arkansas River Valley, South Central Plains, and Mississippi Alluvial Valley ecoregions.

2.2 SCOPE OF WORK
The statewide systematic surveys will determine the current geographic distribution of the species, as well as relative abundances, catch per unit effort (CPUE), demographic structure (i.e., sex ratios, juvenile:adult ratios, etc.), spatial extent of hook ingestion, and can be coarsely compared to the previous statewide surveys in 1994-1995. As part of these statewide surveys, all turtles will be non-invasively assessed for hook ingestion to determine proportion of affected turtles and the spatial extent of the hook ingestion threat in Arkansas. Furthermore, establishing mark-recapture populations can provide additional demographic information (e.g., adult/juvenile survivorship, growth rates, etc.), population abundance estimates, and proportion of turtles that have ingested a hook and the impact of hook ingestion on survivorship. By surveying mark-recapture sites concurrently with the statewide distributional surveys, and collaborating with the US Fish and Wildlife Service’s Mississippi (MSFO) and Arkansas (ARFO) Field Office’s survey efforts, more sites can be targeted across the state of Arkansas. This updated distribution and threat information will inform population viability analyses, allow assessment of population trends over time, and determine where recovery actions may be most effective. Current information documenting species presence and preferred habitat (e.g., habitat suitability modeling) will assist in conservation planning and recovery efforts and furthers understanding of the spatial extent and impact of threats.

2.3 MINIMUM REQUIREMENTS
At a minimum, Contractor must possess at least the following and provide documentation substantiating the same:

Experience and Facilities
The principal investigator (PI) for this study should have a lab capable of conducting alligator snapping turtle focused research. A history of public engagement in the research process is desired. The PI should have the capability and experience in training M.S. and/or Ph.D. students in wildlife ecology or management. Principal Investigators Curriculum Vitae and a statement of qualifications/experience working with alligator snapping turtles and conducting population estimation studies.

Identification of facilities that will be used for the project and their purpose.

Equipment
The Contractor will supply all necessary equipment to conduct research and complete the study.

AGFC will not provide any equipment to the contractor to complete this project. However, AGFC staff may be available to assist with field surveys, and may use AGFC equipment and supplies in the performance of those activities.
Reporting Requirements
A. Report Due Dates
   1. Interim Progress reports due annually for Section 6 grant reports by August 1.
   2. Final project report and raw data due July 31, 2029.

Prospective Contractor(s) must provide documentation substantiating their current coverage for, or the ability to obtain, the insurance coverage listed below, as well as the ability to maintain said coverage, throughout any contract term.
B. Commercial Automobile Liability: $1,000,000 per occurrence Combined Single Limit.
C. Commercial General Liability: $1,000,000 per occurrence; $2,000,000 aggregate limit.
D. Workers Compensation: statutorily required limits but at least $500,000.
E. The above-described insurance coverage shall be endorsed to include the following additional insured language: “The Arkansas State Game and Fish Commission shall be named as an additional insured with respect to liability arising out of the activities performed by, or on behalf of the Contractor(s)”.
F. Insurance coverage must be in place with Contractors duly licensed or authorized to do business in the State of Arkansas and with an “A.M. Best” rating of not less than “A” prior to any contract award.

2.4 PROPOSAL REQUIREMENTS
Each Prospective Contractor must provide the following information in their Proposal in response to this RFP:
A. Cover page containing:
   1. The project title(s), the PI and collaborators names, job titles, affiliations, and contact information.
   2. A project summary (or summaries). Summaries should be a short paragraph describing project objectives, methods, and management implications.
   3. The total cost of the project, the total amount of matching funds, and the total amount requested from AGFC.

   1. Background.
   2. Objectives.

Proposals should be submitted as word or PDF files using 12 point font and 1” margins.

2.5 RIGHT TO REJECT
A. AGFC may reject any equipment deemed not suitable for providing services defined in this RFP.
B. AGFC may reject, at any time during the contract period, the Contractor(s)’s representative, equipment, employee or subcontractor found to be unqualified or incompetent, violates contract provisions, or operates equipment in a negligent or unsafe manner.
C. Should the Prospective Contractor(s) wish to provide personnel and equipment that meet all RFP requirements, they may do so if approved in writing, prior to equipment use, by AGFC. Adjustment will be made to the contract price for providing additional personnel and equipment if included in the Prospective Contractor(s) proposal and approved in writing by AGFC.
2.6 PERFORMANCE STANDARDS
A. The selected Contractor must meet the standards of performance stated in the contract, if applicable.
B. AGFC may be open to negotiations of Performance Standards prior to contract award, prior to the commencement of services, or at times throughout the contract duration. Performance Standards identifies expected deliverables, performance measures, or outcomes; and defines the acceptable standards.

D. All changes made to the Performance Standards shall become an official part of the contract.
E. Performance Standards shall continue throughout the aggregate term of the contract.

G. In the event a Performance Standard is not met, the selected Contractor will have the opportunity to defend or respond to the insufficiency. AGFC shall have the right to waive damages if it determines there were extenuating factors beyond the control of the Contractor that hindered the performance of services. In these instances, AGFC shall have final determination of the performance acceptability.
H. Should any compensation be owed to AGFC due to the assessment of damages, Contractor shall follow the direction of AGFC regarding the required compensation process.

Insurance Coverage Details

Automobile Liability: Must include coverage for both bodily injury and property damage. Commercial policies must include owned, hired and non-owned coverage. Where a personal policy is allowed, the policy must include coverage for business use, and the certificate of insurance must include reference to the business use coverage.

Commercial General Liability: In addition to bodily injury and property damage, must include personal injury coverage with employment exclusion deleted and contractual liability. Such coverage must include products and completed operations.
Workers' Compensation: Must fully cover all employees and supervisors participating in CONTRACTOR’s operations under the Contract. If CONTRACTOR does not carry Workers' Compensation coverage because it does not or will not employ anyone in any matter throughout the term of the contract, or is otherwise exempt from the Workers’ Compensation coverage requirements under Arkansas law, then CONTRACTOR must provide a certificate of non-coverage issued by the Arkansas Workers’ Compensation Commission (or the equivalent governmental authority if CONTRACTOR’s home state is not Arkansas).

Builder’s Risk: Must cover damage for capital improvement projects. Perils to be insured are fire, lightning, vandalism, malicious mischief, explosion, riot and civil commotion, smoke, sprinkler leakage, water damage, windstorm, hail and property theft on the insurable portion of the project on a 100-percent completed value basis or per project aggregate basis against damage to the equipment, structures, or materials.

Professional Liability: Must include negligent acts, errors and omissions, and other breaches of the applicable standards of care established by Arkansas laws or regulations. Must be maintained both during the course of the Contract and after the completion of services under the Contract for a period of three (3) years after substantial completion of the project.

Aviation Liability: Must include public liability coverage. If passengers will be transported as part of the services provided under the contract, coverage must include passenger liability in addition to public liability. Coverage may be combined into a Combined Single Limit policy. Coverage must include unowned/renter’s insurance if CONTRACTOR does not own the aircraft to be used under the Contract.

UAV/UAS (Drone) Liability: Must include coverage for bodily injury and property damage. Coverage must include unowned/renter’s insurance if CONTRACTOR does not own the drone to be used under the Contract.

Pollution Liability: Coverage must include costs and liabilities attributable to bodily injury; property damage, including loss of use of damaged property or of property that has not been physically injured; clean-up cost; and defenses, including costs and expenses (including attorney’s fees) incurred in the investigation, defense or settlement of claims. If coverage is written on a claims-made basis, CONTRACTOR must represent that any retroactive dates applicable to coverage under the policy precedes the effective date of the letter and that continuous coverage will be maintained or an extended discovery period will be exercised for a period of three (3) years (or as required by law) beginning from the time that services under the contract are completed. If the scope of work as defined in the Contract includes the disposal of any hazardous or non-hazardous materials from the project site, CONTRACTOR must furnish to the COMMISSION evidence of pollution liability insurance maintained by the disposal site operator for losses arising from the insured facility accepting waste under the Contract. Such coverage must be maintained in amounts conforming to applicable laws, rules and regulations.

Other: N/A

Quality of Insurer

All policies must be issued by an insurer which has a claims paying ability rating of “A:X” or better or better by A.M. Best Rating Services or not less than “A” by Standard and Poor’s Rating Service, or has an equivalent rating as established by another nationally-recognized statistical rating organization satisfactory to the COMMISSION.

All policies shall be provided by insurers qualified to write the respective insurance in the State of Arkansas and be in such form and include such provisions as are generally considered standard provisions for the type of insurance involved.

Certificates of Insurance

Prior to commencing operations under this Contract, CONTRACTOR shall provide a Certificate of Insurance, satisfactory to the COMMISSION, evidencing the required insurance coverage(s) in the required amounts and upon the required terms. The certificate should include all required endorsements.
Endorsements: Required Policy Language

Insurance policies shall contain the following endorsement(s) and/or policy language:

**Additional Insured Endorsement.** The COMMISSION shall be named as an Additional Insured in the following insurance policies:
- Automobile Liability
- Commercial General Liability
- Pollution Liability
- Commercial Umbrella Liability
- Other: N/A

The Additional Insured endorsement must be noted on the certificate of insurance or other proof satisfactory to the COMMISSION.

**Waiver of Subrogation.** All policies must include a waiver of subrogation provision to prevent the insurance company from recovering monetary damages from the COMMISSION. The waiver of subrogation must be noted on the certificate of insurance or other proof satisfactory to the COMMISSION.

**Notice of Cancellation Endorsement.** Each insurance policy shall contain a clause providing that it shall not be canceled by the insurance company without written notice to the COMMISSION of intention to cancel that is in accordance with Ark. Code Ann. § 23-66-206 or otherwise granting the COMMISSION the same rights as the named insured in the event of cancellation. This endorsement must be noted on the certificate of insurance or other proof satisfactory to the COMMISSION.

☐ The above-described standard insurance endorsements/policy language requirements shall be modified as stated in the approved Deviation Request form attached hereto and incorporated herein.

By signing below, Contractor certifies that it (1) has obtained the required insurance coverages in the required amounts and upon the required terms as indicated in this AGFC Insurance Rider; (2) has provided the Commission with certificates of insurance evidencing the same; and (3) will maintain such coverages for the durations stated in this AGFC Insurance Rider.
